

# ANIMAL COMMUNICATIONS

with MAICCU KOSTIAINEN

## EUROPE 2013

### What is Animal Communication?

It is just like a different language. Just as we learn to speak different language in school, we can also learn to talk with animals.

Animals do not speak with words, but they are sending different sensations, which can be interpreted to words and pictures and also physical feelings. We as humans just sensitize our intuition to feel all those things and everyone can do that!

In the workshop Maiccu will tell you more details about what animal communication is, how you can do it. Animal communication will help you to understand all animals better. During the day we do lots of exercises. You will have tons of fun and find out that there is nothing mystical in communicating with animals.

"Many don't understand why I talk to animals in a different tone. That's OK. The animals understand." ~ A.D. Williams
